## »»» PACKAGES

### Cystitis Package

Our new Cystitis Package, comprising urinalysis, urine culture and sensitivity in one testing bundle is proving popular to maximize the information from urine samples.

This package includes urinalysis, plus culture and sensitivity, plus an extended free MIC panel for highly resistant bacteria (including reserved/last line of defence antibiotics).

### Hygiene Monitoring Programme

Our programme is designed for routine checking of any bacterial contamination in key areas of the veterinary clinic to monitor the effectiveness of surface cleaning and disinfection.

The most effective method of achieving this is to implement a hygiene monitoring programme for your clinic and this programme allows you to regularly check the microbial load in sites such as the operating theatre, consulting rooms and animal housing areas will reveal if there are any breakdowns in hygiene procedures, identify any areas requiring remediation and prevent nosocomial infections. Contact us for details.

### Enhanced Tick Fever Screening

Our Enhanced Tick Fever Screening panel now includes CBC and Coombs testing.

## »»» TESTING TIPS

### Dog & Cat Vaccination Titre Panels

Has your clients pet been adequately vaccinated? Check with the canine and feline vaccination titre panels and receive enhanced vaccination serology interpretation.

## »»» BENEFITS

### Contact Our Pathologists

Did the culture on your submitted sample grow an organism that you have never heard of? Did your patient's biochemistry report show completely unexpected results. Are you unsure what diagnostic steps are available to you? The pathologists at CityU VDL welcome further discussion on current or potential diagnostic cases and are available for discussion via phone or email.

## »»» "NO CHARGE"

### Second Cytology Sample Examination

If your first cytology sample does not yield any diagnostic results, a 2nd cytology is examined at no charge if collected within 30 days.

### Abnormal CBC result review

All abnormal CBC results are review by clinical pathologists at no charge.

### Margin Assessment review

Margin assessment of all histopathology biopsies is provided by anatomic pathologists at no a charge.

### Decalcification

Decalcification of any hard bone samples is provided at no charge.

### Cytology Slides per Site

Cytology slides are often prepared as multiple slides to maximise the diagnostic opportunities.

We have increased the numbers of slides per site to four (previously three).
